Intro.

I'm a proactive, passionate designer with 9+ years experience of producing high quality end-to-end digital solutions which are not only beautiful, but user-friendly. Having a clear understanding of front end development, allows me to collaborate closely with developers, whilst my strong communication skills ensure transparency and empathy with stakeholders. I am a self-motivated individual and committed team player who is flexible and enthusiastic. I have the drive and energy to work hard when up against a problem, drawing upon my resilience and resourcefulness to overcome obstacles. One of my attributes is a strong self belief and positive outlook on life, which allows me to be an effective and valuable member of any organisation. I consider myself to be a reliable and reflective professional who is continually looking for ways to develop my skills.

Experience.

DECEMBER 2021 - CURRENT DATE

Lead UI/UX Designer – TIDE Services Limited, Huntingdon

I lead the UI/UX Design team at TIDE, this involves being responsible for the runnings of daily team stand ups, managing our team backlog, retrospectives, line management, mentoring of our UI/UX Designer and much more.

As the initial designer in the organisation, my role has included setting up a process to incorporate design as a function within the wider delivery teams, as well as creating team OKR's, standards, design systems, kanban boards, personas etc. My workload spans many areas including; prototyping, wireframing, creating user flows & journey maps, carrying out user research via various methods, graphic design & even occasionally video editing.

JULY 2017 - DECEMBER 2021

UI/UX Designer – TIDE Services Limited, Huntingdon

During my time working at TIDE, I work with not only user interfaces in areas such as; wire-framing, prototyping, branding, SEO, but also focus heavily on user experience by working on various areas such as; user research in the form of personas, experience mapping, analytics/tag manager, hotjar, interaction design, accessibility. Since working with this team, we have gone through an agile transformation as a business, incorporating new KanBan practices into the way we work.

My role as a UI/UX Designer involves:

- Being responsible for all aspects of UI & UX design for website builds and internal projects.
- Marketing collateral including; HTML/CSS emails, print, graphics, advert banners.
- Responsive front-end coding using various technologies such as; SASS, LESS, Visual Studio, Angular, Git.
- Managing all UX processes involving research in various forms; usability testing, user journeys, user groups, attending industry events, training sessions, surveys, polls, heat maps, funnel analysis etc.
- Producing wireframes, interactive prototypes, low fidelity and high fidelity mock-ups across mobile, tablet and desktop platforms to enable me to present and demo concepts to the delivery team so that developers can use these as a visual guide when implementing features, as well as for business stakeholders to be able to feedback and collaborate to find the best possible approach.
- Involved in running interviews as part of our internal recruitment process for internal design roles.
- Leading the on-boarding & development of our other internal UI/UX Designer who I have mentored, providing them with guidance and training where necessary.

AUGUST 2014 - JULY 2017

Senior Web Designer – AllTheTopBananas, Peterborough

My role at AllTheTopBananas involved me being responsible for design & implementation of all front-end websites & mobile apps. Having a passion for customer facing apps and responsive websites with beautiful UI and seamless UX, created using high quality HTML5 & CSS3 that

it inline with the latest standards, meant I was able to maintain the best in-class digital brand experiences. I regularly met clients to determine their unique requirements, then worked on all elements from initial wire-framing through to high fidelity mockups while gathering feedback throughout. I worked closely with developers on a daily basis to establish usable, technically feasible products. I maintained the company's various social media platforms, and online marketing material, I created; event stands, email advertisements, presentations and led the creation of the company's new brand identity. I was able to advance my front-end skills by contributing to and executing full stack web projects, focusing on device consistency and cross-browser compatibility.

SEPTEMBER 2012 - SEPTEMBER 2013

Web Developer (Placement year) – *Go Telecom, Brighton*

As part of a placement scheme I worked for Go Telecom before returning to the University of Brighton to finish my third year and graduate. I helped the business grow and develop, as well as broadening my skills and experience. I developed a wide range of skills including marketing, SEO, advertising, usability and applying analytics to the design and development, in which I covered a range of languages such as PHP, HTML, CSS, Javascript, JQuery and CMS platforms. As well as gaining knowledge within the design and development field, I was involved in refining the company's telecoms aspect. This not only involved setting up new phone numbers for clients with relevant services included in their package but in addition this would often involve myself having to record IVR messages, as well as answering customer queries.

Education.

2010 - 2014

University of Brighton – *Bachelor of Science (Hons), Digital Media Development*

I achieved a 2:1 grade, and completed the following modules; 3D Animation and Modelling, Human-computer Interaction ,A Practical Introduction to Databases, Programming, Design for Digital Media, Project Planning and Control, Web Technologies, Website Design and Development, Time-based Media, Interactive Media Development, Mobile Application Development, Digital Post-production, Digital Marketing, Usability Evaluation & Website Design and Development.

2008 - 2010

Hinchingbrooke Sixth Form – *A Levels; English Language, ICT, Graphic Design*

My time at sixth form involved helping out as a 'Buddy' where I would regularly help children in younger years, supporting their confidence and growth throughout secondary school. This helped me become more aware of others problems and has helped me empathise with others. By the end of my work with different children I found that they felt more positive about their particular situation and grew in their resilience.

2003 - 2008

Sawtry Community College – *GCSE*

Mathematics, English Language, English Literature, Science, Media Studies, French, Graphics, ICT.
